

AWARD DECISION

Dnr 2015/6

Public procurement of software solution for alternative investments

Procurement process

Fjärde AP-fonden (AP4) has conducted a public procurement of software solution for alternative investments, using the open procedure in the Swedish public procurement act (LOU).

The tender was announced on February 5, 2015 with a deadline to receive tenders by submitting answers to a questionnaire on March 17, 2015.

AP4 received four tenders. All four tenders fulfilled formal criteria for submitting a tender, as well as all functional requirements that had to be fulfilled according to the questionnaire.

AP4 then evaluated the tenders according to other functional requirements that should be met as well as the cost of the systems.

AP4 selected the most economically advantageous tender.

The awarded tender had the best functionality as well as the lowest cost of the four tenders.

Award Decision

AP4 awards the public contract for system solution for alternative investments to the Burgiss Group.

There will be a standstill period of ten days from the date of the announcement of the award decision until a contract can be signed.
